PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience in Java, React.js, Spring Boot, MySQL, and RESTful API development. Proven ability to build scalable, secure, high-performance web applications with JWT authentication and role-based access control. Proficient in ML pipeline development using Python and Flask — achieving 83.7% predictive accuracy on 1.7M+ records. Microsoft Azure certified with strong foundation in cloud fundamentals and agile practices.

TECHNICAL SKILLS

Languages: Java, Python, C

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive UI Design

Backend: Spring Boot, Flask, RESTful APIs, JPA/Hibernate, JWT Authentication, MVC Architecture

Database: MySQL, SQL Query Optimization

Cloud & Tools: Git, GitHub, VS Code, Eclipse, Postman

PROJECTS

Crime Hotspot Forecasting System | Python · Flask · Random Forest · Scikit-learn

ML-based predictive analytics platform for crime forecasting, enabling data-driven law enforcement decision-making.

- Built end-to-end ML pipeline using Random Forest on 1.7M+ crime records, achieving 83.7% prediction accuracy
- Deployed RESTful prediction APIs via Flask supporting 750+ concurrent users with 99.95% system uptime
- Applied data preprocessing and feature engineering, reducing false positives and improving model robustness
- Improved police patrol route efficiency by 23% through real-time spatial hotspot integration

Book Management System | React.js · Spring Boot · MySQL · JWT

Full-stack web application for library and inventory management with secure authentication and role-based access control.

- Architected RESTful APIs with Spring Boot covering complete CRUD operations for book inventory management
- Integrated JWT-based authentication and role-based authorization (Admin/User) for secure session management
- Built responsive React.js UI with dynamic routing and state management for seamless user experience
- Configured MySQL with JPA/Hibernate ORM for efficient data persistence; tested APIs end-to-end with Postman

INTERNSHIP

AWS Academy Cloud Virtual Internship | NEAT (AICTE) & EduSkills April 2024 – June 2024

- Completed a 10-week Cloud Virtual Internship under the AICTE NEAT initiative, delivered by EduSkills with curriculum provided by AWS Academy
- Built foundational knowledge of cloud computing concepts, AWS core services, and cloud architecture best practices
- Achieved Grade B on successful completion of the program

EDUCATION

B.Tech in Computer Science & Engineering 2021 – 2025

Seshadri Rao Gudlavalleru Engineering College, Andhra Pradesh CGPA: 7.84 / 10.0

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft
- Privacy and Security in Online Social Media — NPTEL – IIT
- Data Science and Machine Learning Capstone — IBM
- .NET Full Stack Development — Wipro TalentNext
